- ✓ 15+ years of experience working in public health, including
- ✓ 12+ years managing health-related projects
- ✓ Serves as Karna's Senior Program Manager

347-672-4596 | lwong@karna.com

“ I live by the golden rule: treat others the way you want to be treated. ”

Leslyn Wong is a tested program manager and proven problem-solver, with more than 12 years of experience managing health-related projects, including more than 7 years contracting with the Federal government. Her Karna portfolio includes 10 completed and six current projects. Her project management responsibilities include managing personnel and budgets in both public and private sectors, providing communication, as well as scientific, technical, and programmatic support to both domestic and global health partners.

At Karna, she puts her solution-oriented mindset to work. Recently, her team provided technical support to the CDC Division of Global HIV & Tuberculosis (DGHT) in order to facilitate the transfer of orphans in two countries (Uganda and DRC) from the USAID portfolio to the CDC portfolio. This support included providing a template to evaluate the transfer process, creating training to assist the independent contractors on the ground, working with CDC headquarters and the local field offices to address any issues or concerns, and creating lessons learned documentation.

Leslyn holds a Master of Public Health in Community Health Education from New York University and a Bachelor of Science in Biology and Science Education from New York University.

She honed her public health skills at Morehouse School of Medicine (MSM), National Center for Primary Care (NCPC). There, she supported several community-based participatory research (CBPR) initiatives in areas of chronic diseases that disproportionately affected minority populations.

She is a Certified Health Education Specialist (CHES) and serves as a mentor for new and upcoming Public Health Professionals.
